

AI & Fuzzy Logic - Combined Past Papers (2023-2024)

- Q1. Perform Union, intersection, difference and complement over the fuzzy sets [Numerical Question] [10 Marks]
- Q2. List and explain fuzzification methods (membership methods) [5 Marks]
- Q3. Explain Markov decision process in detail [10 Marks]
- Q4. Explain Bayes Theorem [5 Marks]
- Q5. Explain Bayesian Belief Network with examples. Harry Burglar Alarm system [10 Marks]
- Q6. Differentiate between Fuzziness and Probability [5 Marks]
- Q7. Perform algebraic sum, algebraic product, bounded sum and bounded difference on fuzzy sets [Numerical Question] [10 Marks]
- Q8. What are fuzzification methods? Explain them in detail. [5 Marks]
- Q9. List and explain defuzzification methods [5 Marks]
- Q10. State and explain Bayes Theorem with an example. [8 Marks]
- Q11. Explain centroid method of defuzzification [5 Marks]
- Q12. Explain advantages and disadvantages of cognitive system [5 Marks]
- Q13. What is the difference between Fuzziness and Probability? [6 Marks]
